ELIAS ALSTÉUS

elias.alsteus@gmail.com | +46 76 321 78 30 | LinkedIn | Portfolio | RunIt on the App Store

Mechanical Engineering student specialising in Logistics and Supply Chain Management. Founder of RunIt, a social fitness app I took from idea to launch on the App Store and Google Play and now grow using data on how users behave. Four years of technical installation and sales taught me to solve problems on site, under time pressure and in front of the customer.

Education

Linköping University — **Linköping, Sweden**
M.Sc. Mechanical Engineering — Aug. 2023 to Jun. 2028 (expected)

- **Master's profile:** Logistics and Supply Chain Management.
- **Bachelor's thesis (Jun. 2026):** Helios 3.0, a remotely operated firefighting robot. Validation, testing and iterative development in an 18-person team; I led the control system (Arduino, C++), reaching over 300 m remote-control range.

National Yang Ming Chiao Tung University (NYCU) — **Hsinchu, Taiwan**
Exchange semester, master's level courses — Sep. 2026 to Jan. 2027

Tranemo Gymnasieskola — **Tranemo, Sweden**
Technology Program, Design and Product Development — Aug. 2018 to Jun. 2021

Entrepreneurship

RunIt — **Linköping, Sweden**
Founder — Jul. 2026 to present

- Founded and built RunIt, a social fitness app where friends complete virtual adventures together, such as the Great Wall of China, using the distance from their own training.
- Took the product from idea to launch on my own: product design, AI-assisted development, Apple Health integration, App Store review, in-app purchases and user support.
- Use retention data to steer growth: 72 users as of 20 Oct. 2026 and 68 % still active after 30 days. Users invited by friends stay far longer than those from shared links, so I shifted my focus to invitations.
- Live on the App Store since Aug. 2026 and on Google Play since Nov. 2026.

Work Experience

Borås Markis Service AB — **Borås, Sweden**
Technical Installer and Sales *(part time and full time)* — Jun. 2021 to Aug. 2025

- Sold and installed customised sun protection solutions, including single installations worth over 100,000 SEK, running several customer projects in parallel from technical advice to finished installation.
- Part of a 3 to 4 person installation team that delivered the company's best overall results in about a decade.
- Customers regularly sent positive feedback about my work directly to management.

Care of Sweden and Larssons Trä AB — **Tranemo, Sweden**
Assembly, Production and Warehouse Worker — Summers 2017 to 2021

- Assembly line work, packing of finished goods and assembly of medical products (Care of Sweden makes products that prevent pressure ulcers).

Extracurricular Experience

Juno UF (Ung Företagsamhet) — Aug. 2020 to Jun. 2021

- Co-founded a one-year student company that designed and sold socks. Responsible for product design, branding, sales and finances.

Tranemo IF — **Tranemo, Sweden**

- Played football from youth to senior level and was team captain in selected matches. Kept commuting to weekend matches after moving to Linköping.

Other

Languages:	Swedish (native), English (fluent), German (basic)
